A Fair Tale is the telling of the long/short history of the country fair and festival. The timeline begins with the grandiose fairs of the ancient Mediterranean through to the Dark Ages of Europe and the multiplication of Trade Fairs in England. It then hops across the “pond” to Canada where the role of the simple country fair became an institute for economic, social and political change always keeping at its heart a need to educate and evolve the passion for community.

ANIMAL TALES

Animal Tales is the telling of the domestication of animals and their relationship to humans. Innovative Steam Punk costumes with hints of animal attire, dynamic music, an original script and highly charged dance are all integral components of this entertaining and communicative work.

FROM HAND TO PLOUGH

All these great discoveries and the transitions through time are danced in rhythm and spoken in rhyme, Combining various arts mediums to present the fantastical development of farm machinery.
