

## THE LITTLE MATCH GIRL – Revisited

Set within a totalitarian society, a pair of street performers, a father and a daughter, prepare to present their puppet version of The Little Match Girl. Two guards however forbid them to present anything with antigovernment themes. A conflict ensues and the father is taken away. The puppet stage, the family's livelihood, is destroyed. The daughter is left destitute and in despair. Hungry and cold, she retreats into the only world where she finds comfort...her dreams. In this state the world around her comes to life. Dancing snowflakes, food and puppets all become her friends. In the end she imagines herself reunited with her father.
